

Juan Carlos Gadea Brenes

Systems Engineer | Front-End Developer |
Project Manager | Data Analyst

Systems Engineer with a solid track record in managing technological projects, front-end development, and data analysis. Proven experience as a Project Analyst, Developer, and Scrum Master in agile environments (Scrum and Kanban), applying efficient methodologies and tools such as Jira, Trello, Notion, and Asana. Advanced proficiency in technologies including React, Angular, JavaScript, TypeScript, Python (Pandas, NumPy, Seaborn), SQL, and AWS. Focused on continuous improvement, technical leadership, and coordinating multidisciplinary teams. I am motivated to work in collaborative environments where continuous improvement, clear communication, and a results-driven mindset are top priorities.

Professional Experience

CLARO NICARAGUA. MAY. 2022 - ENE. 2025

*Systems Analyst | Project Analyst | Programmer Analyst –
Digital Transformation*

Define objectives, timelines, and required resources, ensuring alignment with strategic goals. Lead IT system projects, evaluate technical proposals for system implementation, and oversee the development of digital channels and distribution systems. Monitor project progress, identifying and resolving deviations in time, cost, or scope, and manage necessary changes. Facilitate integration across departments by coordinating communication and collaboration between IT, operations, commercial, and other key areas to ensure project success.

Manage resources and task allocation, ensuring appropriate distribution of human and material resources for each project phase to maximize team efficiency. Generate project status reports for senior management, maintaining clear and consistent communication regarding progress and challenges. Proficient use of Agile tools such as Trello and Jira, including their integrations. Apply Agile methodologies, including Kanban and Scrum.

Support digital transformation and continuous improvement initiatives in close collaboration with the IT department and other areas. Promote continuous improvement in project management processes and facilitate team training when needed. Coordinate with key stakeholders, both internal and external, ensuring their expectations are met throughout the project lifecycle. Ensure compliance with internal policies on security, technology use, and information management.

Evaluate results and performance, document lessons learned and best practices. Perform any additional functions requested by management, such as application support. Provide support for led projects and share acquired know-how with other internal IT teams.

SERVICALL TELEFONÍA - AGENTES AUTORIZADOS MOVISTAR (COSTA RICA). ENE. 2020 - JUN.2020

Telemarketing Executive – Freelance

Spanish-language call center. Responsible for executing the telemarketing process for postpaid plans, both with and without devices, through phone calls using a VoIP application. Managed social media and WhatsApp Business to engage with customers, as well as handling a large-scale customer database. Maintained detailed control of the client portfolio, providing assistance, support, and follow-up, and generating daily reports on sales and call activity. Ensured accurate handling of all information related to the products and services offered, guaranteeing that customers received clear and complete details.

- Power BI

Training

- 2005: Microsoft Excel Course (FUTUREKIDS), Masaya, Nicaragua.
- 2015: Participation in the Scientific and Technological Fair (UNI-IES), Managua, Nicaragua.
- 2016-2017: IT ESSENTIALS CISCO Certification - Technical Support and Operating Systems (Centro Juvenil Don Bosco).
- 2022: Introduction to Web Development I: HTML and CSS - Certified Course (Google Activate).
- 2022: Responsive Web Design: HTML, CSS, FLEXBOX, GRID, WEB RESPONSIVE - Certified Course (FreeCodeCamp).
- 2022: AWS Practical Course for Beginners: Concepts and Practices on Amazon Web Services - IAM, AML, EC2, S3, RDS, Amazon DynamoDB (Cloud Computing Community of Nicaragua).
- 2023: Terraform on AWS - Terraform Specialist Course.
- 2023: Introduction to GPON Networks (Claro, Nicaragua).
- 2024: Fundamentals of Project Management - Google (Coursera).
- 2024: Multicloud Fundamentals Certificate (Braintcamp).
- 2025: Introduction to Data Analysis with Python (Desafío Latam).
- 2025: Fundamentals and Concepts of Data Science (Código Facilito).

INISER INSTITUTO NICARAGUENSE DE SEGUROS Y REASEGUROS. JUL. 2018- JUN.2019

Junior Developer

Analysis, development, and maintenance of information systems and databases. Designed and implemented solutions from scratch, created custom reports, and managed internal web portals. Provided user guidance and support regarding system functionalities. Utilized tools such as Excel and Oracle PL/SQL for advanced queries and efficient data management, including Oracle Forms and Reports. Maintained an organized log of resolved cases and user interactions, recording detailed information for each intervention. Conducted thorough validations of SQL queries and developed code to ensure quality and proper functionality. Implemented new features in existing systems to enhance performance and capabilities. Delivered user training and support to ensure correct usage of the systems, both internally and externally. Executed queries using PL/SQL

INISER INSTITUTO NICARAGUENSE DE SEGUROS Y REASEGUROS. JUN. 2017- JUN.2018

Underwriting Analyst & Data Entry Specialist - Insurance Policies

Responsible for managing the analysis and underwriting of insurance policies using specialized underwriting systems and ensuring accurate digitization of information. Played a key role in training both internal underwriters and external personnel affiliated with the company. Provided technical support for agricultural insurance systems using GPS technology to ensure accuracy of policy data. Managed and operated the insurance underwriting systems. Delivered training to external affiliates, including Credileasing, ProMujer, FDL, and insurance brokers, on insurance products and underwriting processes. Ensured all underwriting records and related information were correctly entered and stored in the appropriate systems. Provided support for innovative systems, contributing to the company's growth and operational efficiency.

RS SEGURIDAD DIGITAL INTERNACIONAL. MAR. 2017 - MAY. 2017.

Technical Operations Assistant

Provided preventive and corrective maintenance, technical support, repair, and installation of computer equipment and CCTV security camera systems across various Walmart supermarket locations in Nicaragua. Delivered both on-site and remote technical support to operational teams. Ensured the security and proper functioning of technological infrastructure in assigned stores. Demonstrated strong communication skills to interact effectively with work teams and end users.
